

Moneyfacts® Key Features

data services

Moneyfacts offers a wide range of data solutions, providing accurate whole-of-market coverage of mortgages, savings, credit cards, personal banking and loans. Used in all types of applications, from large comparison websites serving the general public to specific corporate intranet sites and call centre systems, Moneyfacts data can be supplied as a Datafeed or Webservice.

Moneyfacts is renowned for its accuracy across the financial services sector and by sourcing information from our databases you too can relax in the knowledge that your application has the most accurate data available.

Moneyfacts Datafeeds

Moneyfacts Datafeeds are static documents containing whole-of-market information for credit cards, mortgages, savings, loans, personal banking and Best Buys. Flexible and accurate, they are suitable for a range of tasks including market analysis, creating tables and producing comparisons. Updated and downloaded daily, these XML Datafeeds provide ultimate control for anyone looking to create a customised web application.

- Moneyfacts Datafeeds are provided in an easy to use XML Datafeed with each product identified by a persistent unique identifier
- Datafeeds can be processed, imported, displayed or referenced as required
- Each Datafeed is provided with comprehensive documentation in the form of a fully annotated XSD schema file
- Moneyfacts Datafeeds can be integrated with your advertising 'apply click deals'
- A free of charge Trial Access Licence is available, providing a snapshot of data to evaluate before purchasing.

Moneyfacts Webservices

Moneyfacts Webservices provide a portal to Moneyfacts' databases. Available for both mortgages and savings they are used to power online search or sourcing tools. Moneyfacts Webservices process details via an online search form returning relevant product data as a tailored results page. Moneyfacts Webservices plug into the Moneyfacts databases which are updated throughout the day, ensuring timely and accurate whole-of-market coverage.

- Webservices can be processed, imported, displayed or referenced as required
- Moneyfacts Webservices include all search logic, calculations and statutory information needed to produce a wholly compliant service
- Each Webservice is provided with comprehensive documentation in the form of a fully annotated XSD schema file
- Moneyfacts Webservices can be integrated with your advertising 'apply click deals'
- A free of charge Trial Access Licence is available.

Moneyfacts Data Service customers receive full support and guidance

Moneyfacts' staff are available to support you during the implementation phase of your project. From our expert research team who will answer any product related questions to our knowledgeable data service team who will answer your implementation, mapping, technology or integration queries, all staff are happy to assist.

All Data Services come complete with a full support package to allow you to complete your project successfully. If, however, you feel you require additional help with the integration we also offer a dedicated consultancy service. Please speak to our sales team for details.

Our support does not cease once your Data Service has been implemented, the Moneyfacts Servicedesk is available for all data queries and our staff - both research and technical - will answer any questions you may have.

MONEYFACTS BEST BUY TABLE DATAFEEDS

Moneyfacts Best Buy tables are the quick reference guides to the best financial products on the market. Compiled and reviewed daily by our research teams, Moneyfacts Best Buy tables are shown throughout the industry and media, including leading national newspapers and major broadcasters. Our Best Buy tables are the most trusted source of Best Buys available.

The Best Buy tables are the ideal, simple way of presenting financial information for your customers. Most customers use them to promote their website, generating return visits by having best of breed content, to improve their websites topicality and volume.

The tables are available in XML format for easy integration into your website. Files are updated daily and provided with full documentation to aid with your integration. By using our XML Datafeeds you have control over the presentation of the tables and any application process. The Best Buy products, however cannot be changed or added to.

Moneyfacts creates Best Buy tables for the following markets (modules) and products.

Best Buy tables are available by individual module or on a licence to use all. Customers can select which tables to display from any purchased module.
