

Investment Life & Pensions Moneyfacts Data Resource provides accurate coverage of Level Term Assurance, Decreasing Term Assurance, Annuities and Income Protection for use by Aggregators, Intermediaries and Providers.

For technical data integration into any type of online application or internal system, Moneyfacts can provide Data Resource as a **Datafeed**. This is a static document of data in a flexible and comprehensive format (CSV or XML) that can be used to power customised web applications such as online comparison tables. Downloaded daily, the Moneyfacts Data Resource Datafeed gives you the most up to date and accurate information available.

Moneyfacts also provides Data Resource in **Excel format**. These functional documents provide an immediate view and analysis of the data with the full use of Excel functionality. Using a combination of business rules, statistical analysis, colour coding of key competitors, highlighting of product changes and many other facilities, Data Resource will undoubtedly save you valuable time in the generation of routine reports and even allow you to monitor a new market that you may not currently be competing in.

The data within Data Resource covers a range of scenarios enabling the view and comparison of available rates from each provider without the need to run individual searches. In addition the Excel formats built-in functionality displays highest, lowest and average figures and can rank a chosen provider in relation to its peers. Data Resource is an invaluable tool for tracking individual rate changes, relative competitiveness, market trends and provider consistency.

INVESTMENT LIFE & PENSIONS MONEYFACTS DATA RESOURCE DATAFEED:

- Available in XML or CSV format
- Downloaded daily
- Data can be processed, imported, displayed or referenced as required giving complete flexibility
